(54) Less irritative detergent composition

(57) A detergent composition comprising a sulfosuccinate surfactant and a hydroxysulfobetaine surfactant at a specific ratio is disclosed. A detergent composition comprising a sulfosuccinate surfactant, a hydroxysulfobetaine surfactant and a silicone derivative is also disclosed. These detergent compositions show good foaming properties, a high detergency, excellent effects of solubilizing, stably emulsifying and stably dispersing oily components, give a good texture, for example, to the skin and hair during and after washing and has a low irritativeness.
